EDUCATION

University of California Los Angeles (UCLA)

June 2026

B.S. Statistics and Data Science & B.S. Cognitive Science w/ a Specialization in Computing

GPA: 3.90/4.0

- Relevant coursework: Statistical Models and Data Mining, Linear Models, Data Analysis and Regression, Mathematical Statistics, Data Structures and Algorithms, Psychological Statistics, Linear Algebra, Python with Applications
- Winner of Best Data Engineering and Preparation at ASA Datafest 2024

WORK EXPERIENCE

TraceGains, Denver, CO

Data and AI Associate

October 2024 – Present

- Created an AI-powered system that improves customer modules by identifying risks in real time and generating user alerts
- Designed interactive risk cards that incorporate urgency markers and facilitate user-friendly access to complex data
- Collaborated closely with product and engineering teams to implement a large language model (LLM) application to provide comprehensive overviews of daily alerts and assess supply chain sustainability metrics, enhancing strategic decision-making

Data Analyst Intern

June 2024 – September 2024

- Improved supplier location and item mapping accuracy by 60% on 80k+ supplier data with 550k+ ingredients using NLP, PyTorch, and MiniLM BERT models, thus reducing manual data sorting time by 85%
- Optimized supplier data processing, achieving a 262% increase in high-quality matches and a 99% reduction in NULL matches, and developed 2000+ new categories to enhance operational metric tracking

IBM Accelerate, Client Engineering and Technical Sales, Remote

May 2024 – July 2024

- Designed, implemented, and tailored online chatbot for IBM client using NLP, LLM, and sentiment analysis to summarize conversations, collect sentiment, and provide information, increasing business efficiency and customer satisfaction
- Led demonstration of Watsonx generative AI chatbot, utilizing engaging conversation, active listening, critical thinking, and persuasive communication to effectively showcase its advantages, aligning with the company's goals

Teaching and Learning Lab, Undergraduate Research Assistant, Los Angeles, CA

September 2023 – June 2024

- Analyze and clean extensive high school textbook data, creating visualizations of usage patterns and engagement metrics and their correlation with learning, leading to targeted improvements in 3 out of 10 chapters and enhanced learning outcomes
- Conduct exploratory data analysis on student motivation from chapter surveys to understand engagement and learning trends, highlighting motivation as a crucial indicator of learning and identifying solutions for declining motivation

RELEVANT EXPERIENCE

Yelp Review Rating Prediction | Python, TensorFlow

June 2024

- Preprocessed data by combining 3 datasets and normalizing the text by removing stopwords, URLs, hashtags, and punctuation, enabling accurate feature engineering and sentiment analysis for an improved prediction of Yelp star ratings
- Designed and ran experiments with linear regression, machine, & deep learning models (CNN, BERT) with hyperparameter tuning and L2 regularization to optimize sentiment-based Yelp review predictions, achieving significant MSE improvement

The Data Science Union at UCLA (DSU), Data Analyst

April 2024 – Present

- Developed a stock price anomaly detection and forecasting model using STL decomposition and ARIMA, and analyzed market volatility with Hidden Markov Models to identify trends and risk levels for NVIDIA, Apple, and Microsoft
- Achieved 1st place in final project upon completing a 10-week curriculum, from a 16-person cohort out of 300+ applicants

DataResolutions at UCLA (DataRes), DataTeach Head

October 2023 - Present

- Spearheaded a Computer Vision workshop for the broader UCLA community and developed a YouTube series to supplement a newly designed, comprehensive 8-week curriculum for high school students, increasing accessibility and engagement
- Reconstructed DataTeach and managing a team of 12 data science students, overseeing recruitment, outreach, curriculum development, and fostering student engagement throughout the program

SKILLS

Technical: Python (Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch), R (Tidyverse), C++, Tableau, SQL, Microsoft Office

Professional: Mandarin, leadership, problem solving, conflict resolution, cross-functional collaboration, empathy, active listening
